SARS-COV-2 (COVID 19) RT PCR

SAMPLE TYPE	NASOPHARYNGEAL & OROPHARYNGEAL SWAB
SRF ID	1931503269418
METHOD	MULTIPLEX REAL TIME RT-PCR
RESULT	NEGATIVE

KIT USED:

The CoviPath™ COVID-19 RT-PCR Kit

LIMITATION :

- The CoviPath™ COVID19 RT PCR Kit performance was established using nasopharyngeal and oropharyngeal swab, nasopharyngeal aspirate, and bronchoalveolar lavage samples only.
- Negative result does not rule out the possibility of COVID 19 infection and should not be used as the sole basis for treatment or other patient management decision. Presence of inhibitors, mutation and insufficient RNA specific to SARS COV-2 can influence the result.
- This kit uses purified RNA as a sample for the analysis. The quality of the RNA recovered from biological samples are essential for the quality of the results generated with this kit.
- A false negative test could be due to low viral load or presence of inhibitors in the sample.

Disclaimer:

This test is based on Real Time reverse transcriptase PCR technology for the qualitative detection of severe accute respiratory syndrome CORONA VIRUS 2 (SARS CoV 2) specific RNA.

NOTE:

1. ICMR Registration Number for SARS CoV 19:GEPLRWB.
2. Test is conducted with ICMR / CE-IVD / USFDA approved kit.
